Resolved a conflict

When I was belonging to the gymnastic club, I conflicted with my teammate because we had different opinions to make the good performance. Also, she was like stubbornness, which means she never changed her mind, so we couldn't solve and groom by ourselves. Therefore, I asked my other teammate if she could solve and listen our problem. That is why, I choose arbitration as a solution because I didn't know what should I do to solve problem, so I thought we need the other person who can listen and fair decision. If we chose the arbitration, whether the third person will make the decision or not depends on he or she. However, when people can't resolve the conflict, they sometimes need third person.
